

Plan Jericho
Integrating the Future Force

AIR FORCE

(U) Why Transform

Evolving Threats
Increased competition for global commons
Unprecedented ability to access data
Government needs rapid and agile military options
Introduction of 5th generation technology

(U) Implementation Themes

Harness the combat potential of a fully integrated force

- Future Air and Space CONOPs
- Enhanced C2 through Decision Superiority
- Train as we fight
- Integrated simulation and experimentation

Develop an innovative and empowered workforce

- Culture of innovation
- Contemporary trade structures
- System of systems thinking
- Simplified horizontal and vertical organisational structures

Change the way we acquire and sustain capability

- Acquisition times match technology
- New ways to sustain capabilities
- Attending to the enablers
- Force by design

(U) Vision

Agile
Adaptive
Information Age
Truly Joint

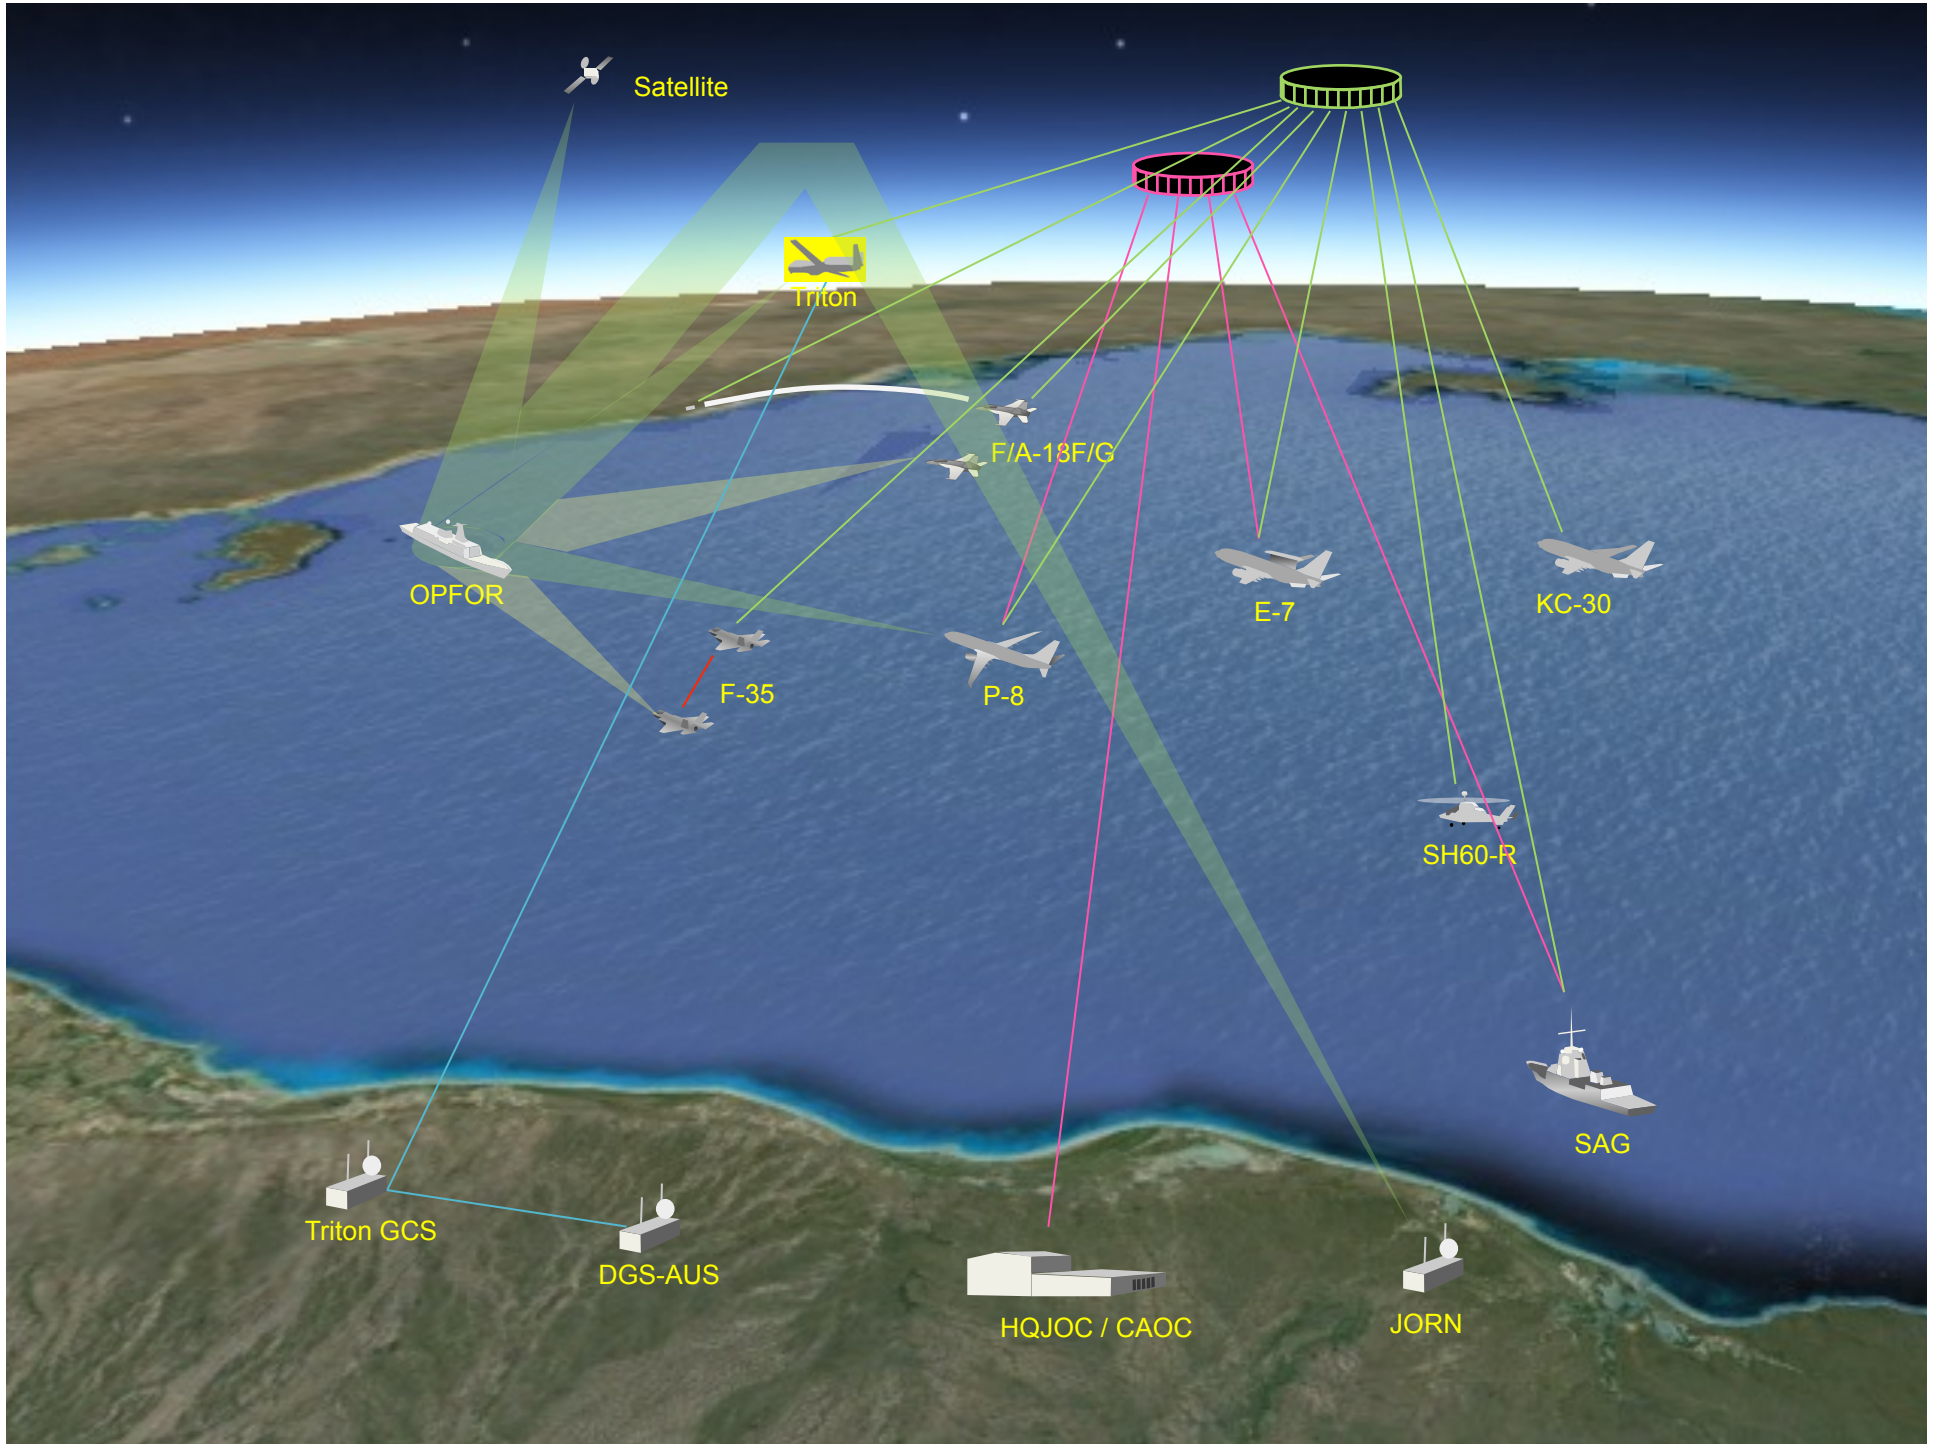

2015

Air Force Implementation Plans

2025

AF Approach to War-fighting

- Air Control first; “Information Control” required
 - Persistent versus cued/focussed effects
- C2 to achieve “decision superiority”
 - Networked to support decisions
- Integrated air and space power effects
 - lethality, survivability, resilience, force optimisation

Jericho Program of Work

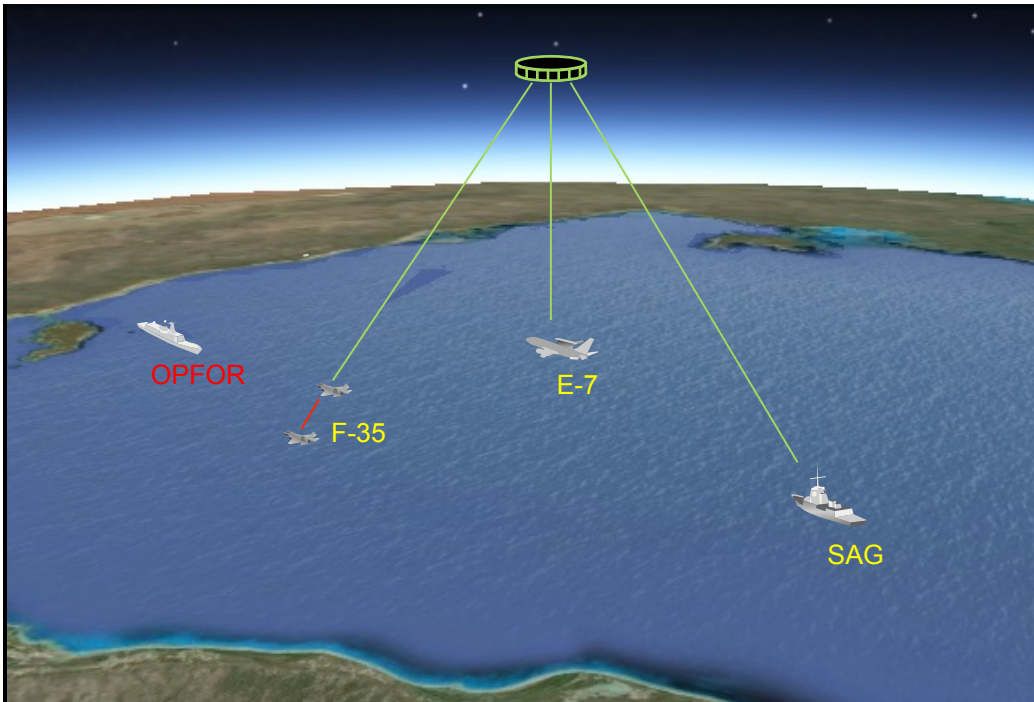

- The Program of Work outlines the integration activities that will transform Air Force over the next ten years.
- It is the means by which Plan JERICH0 turns strategy into action.

TDL Considerations

- Network requirements
 - Joint force integration: legacy challenges
 - Bespoke networks / effects
 - C2 *versus* Tactical *versus* Training/Admin
 - Standards: COP *versus* IFC
 - Security
- Networks: a capability
 - FIC implications

Future Networked Force

- Convergence of Battlespace Awareness, C2, Manoeuvre and Fires
- Open System Architecture
 - Secure/LPI/flexible communications
 - Multiple network “applications”
 - Rapid insertion of technology
- “Manoeuvre” in the information (EM, Cyber) domain
- Cognitive computing / Intelligent Agents
 - Distributed C2
