

Nova Systems

Welcome

Tactical Data Link (TDL) Training & Development

– ADF Defining A New Way

TDL Summit
Canberra Convention Centre
12 November 2018

Introduction – Paul Czajkowski (ski)

Nova Systems

- Retired Royal Air Force 22 years
- 1990 RADAR & TDL user within tri-service environment
- 2005 16 Air Assault Brigade
- 2007 MIDS ISTAR Officer
- 2009 Joint Data Link Management Organisation (JDLMO)
- 2012 Civilian 😊 to instruct and support TDL at NATO, UK & National DLMCs
- Test & Evaluation

The quality of our people is the foundation of Defence's capability, effectiveness and reputation¹

Australian Government

Department of Defence

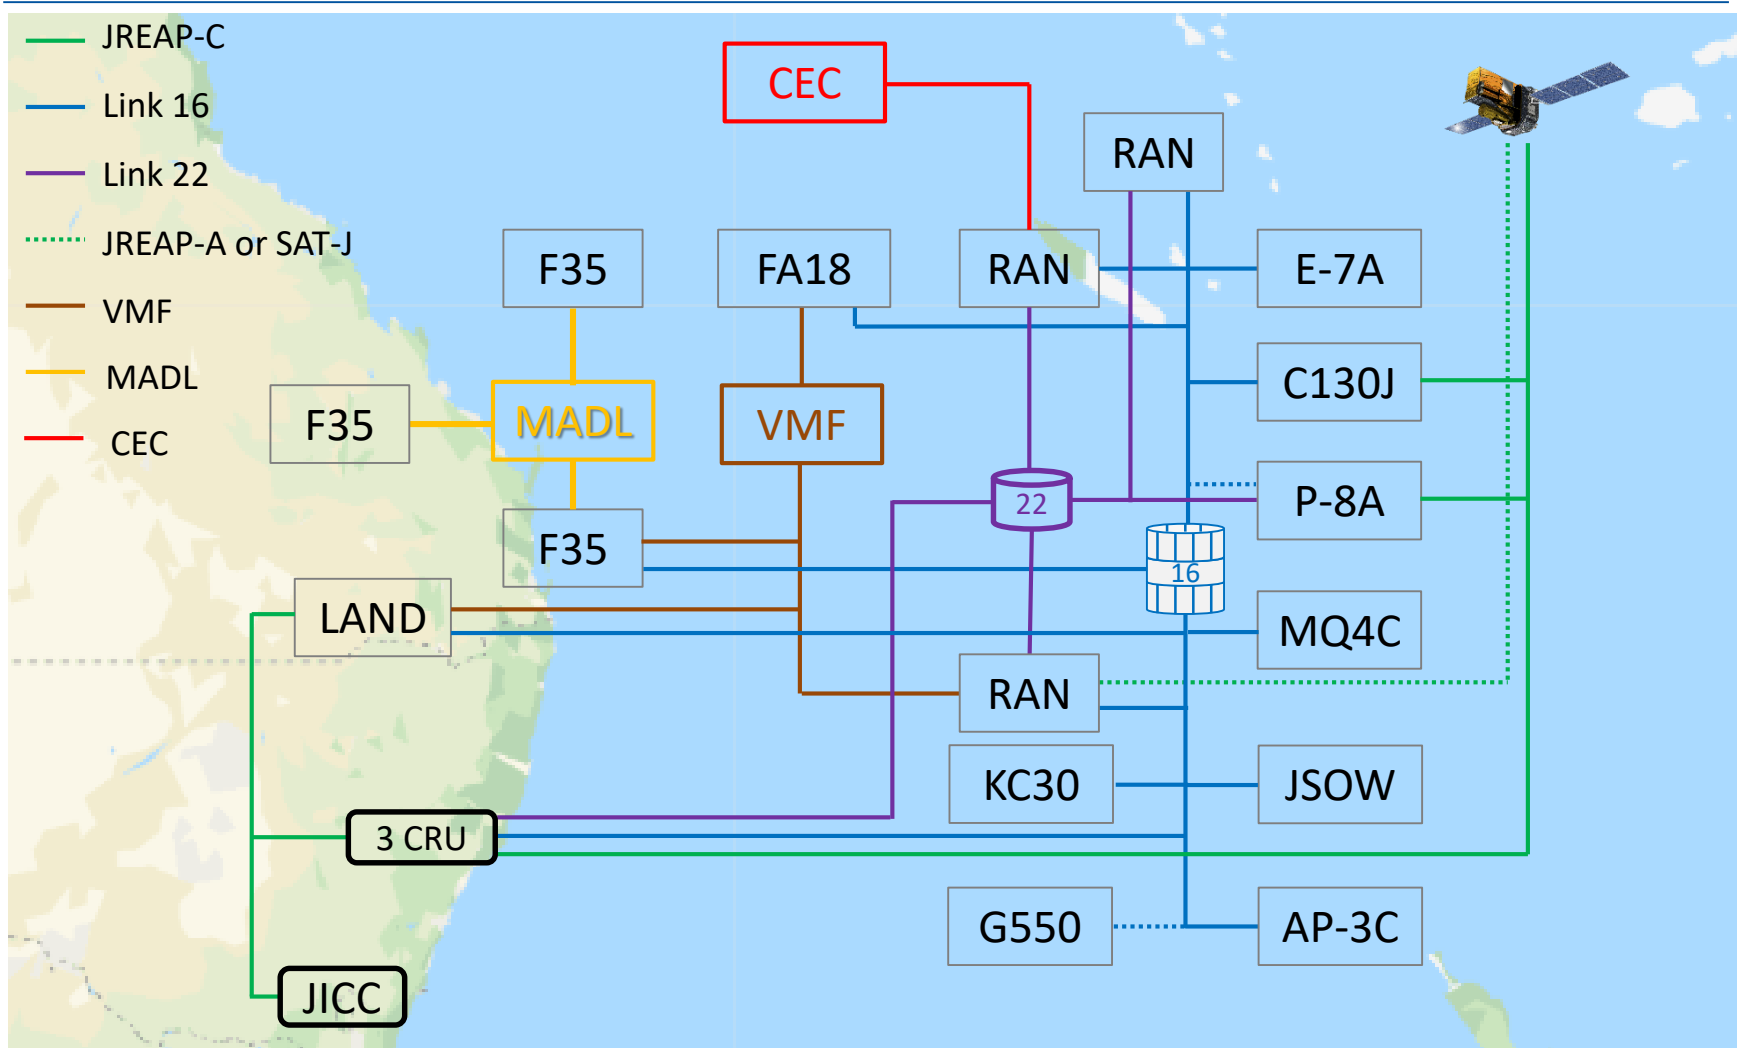

- Defence White Paper 2016 identified a need for the ADF to become more effective by applying more **joint** force
- Introduction of new platforms, capabilities and technologies will create new challenges

1-Australian Government Department of Defence 2016 Defence White Paper - People

Multi TDL Network – 2020+

Nova Systems

ADF TDL Current Challenges

Nova Systems

➤ Many TDL challenges to be overcome

Link 16 Enhancements	MIDS BU 2	MIDS-JTRS
Frequency Remapping (FR)	✓	✓
Crypto Modernisation (CM)	✓	✓
Enhanced Throughput (ET)	✓	✓
Concurrent Multi-Netting (CMN-4)	✗	✓
Concurrent Contention Receive (CCR)	✗	✓
Further Capabilities	✗	✓

ADF TDL Current Challenges

Nova Systems

- Introduction of the F-35A Joint Strike Fighter (AIR6000 Phase 2A/2B)
- Utilises MIDS Link 16, Variable Message Format (VMF) & Multifunction Advanced Data Link (MADL) capability
- Existing Australian VMF capable platforms – RAN & F/A-18 Fleet
 - ▼ Interoperability ☹️
- VMF v Link 16 for the provision of Digitally Aided Close Air Support (DaCAS)

Link 22

Nova Systems

➤ Link 22 is a secure BLOS TDL system allowing transfer of tactical data and connecting multiple units

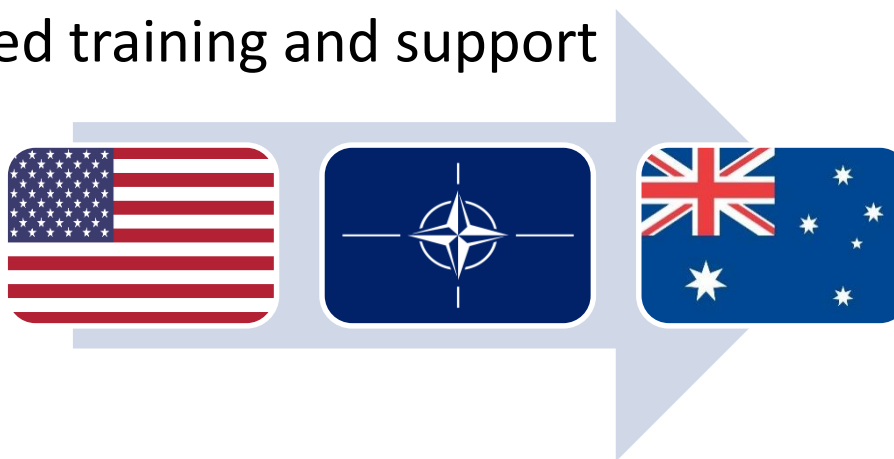

➤ Complements Link 16 and replaces Link 11

Link 22 Challenges

Nova Systems

- Concept of Employment (CONEMP) & Operations (CONOP)
- Understanding platform capabilities
- OPTASK Link Message = Link 22 Network Design
- Balanced training and support

Link 22 Challenges

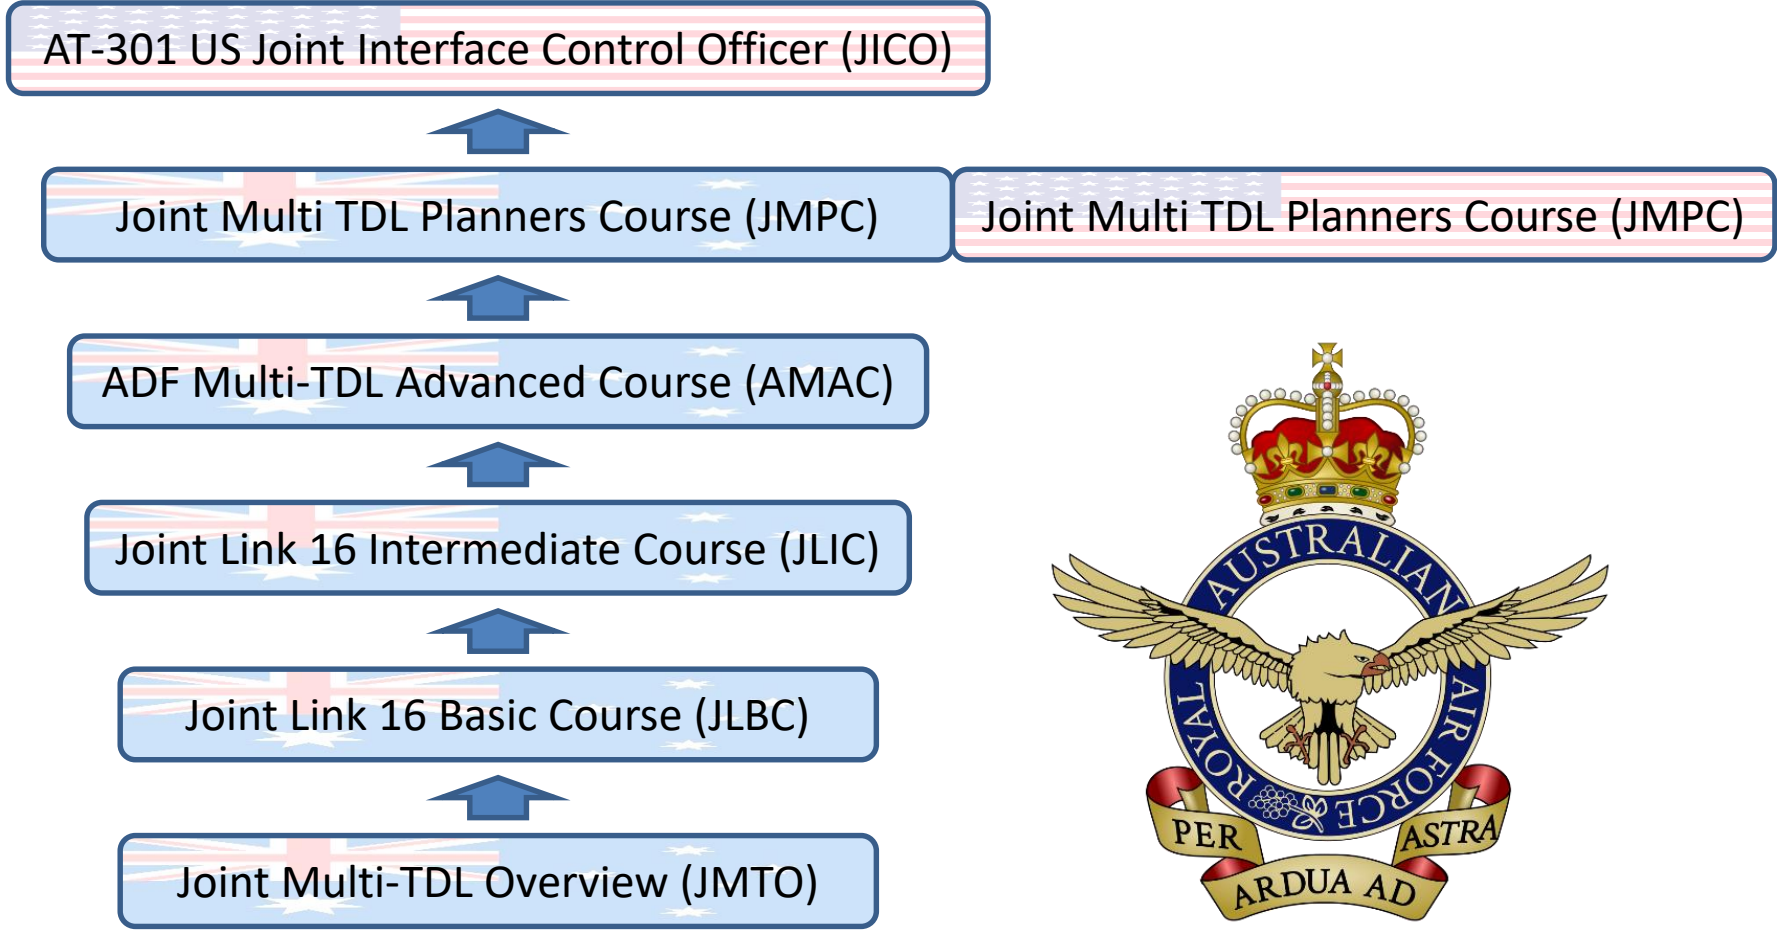

Nova Systems

- Network Management is largely an automated process but....
 - ▼ Congestion Management, Connectivity & Relay & Routing Management.....*how does it really work??*
- Link 22 Manager has to be equipped with a high degree of knowledge of how Link 22 exactly works
- Operationally critical that both operators and managers are trained to the appropriate level
- Understanding the technology early should assist in defining these levels

Current RAAF TDL Training

Nova Systems

Current RAN TDL Training

Nova Systems

AT-301 US Joint Interface Control Officer (JICO)

Joint Multi TDL Planners Course (JMPC)

Joint Multi TDL Planners Course (JMPC)

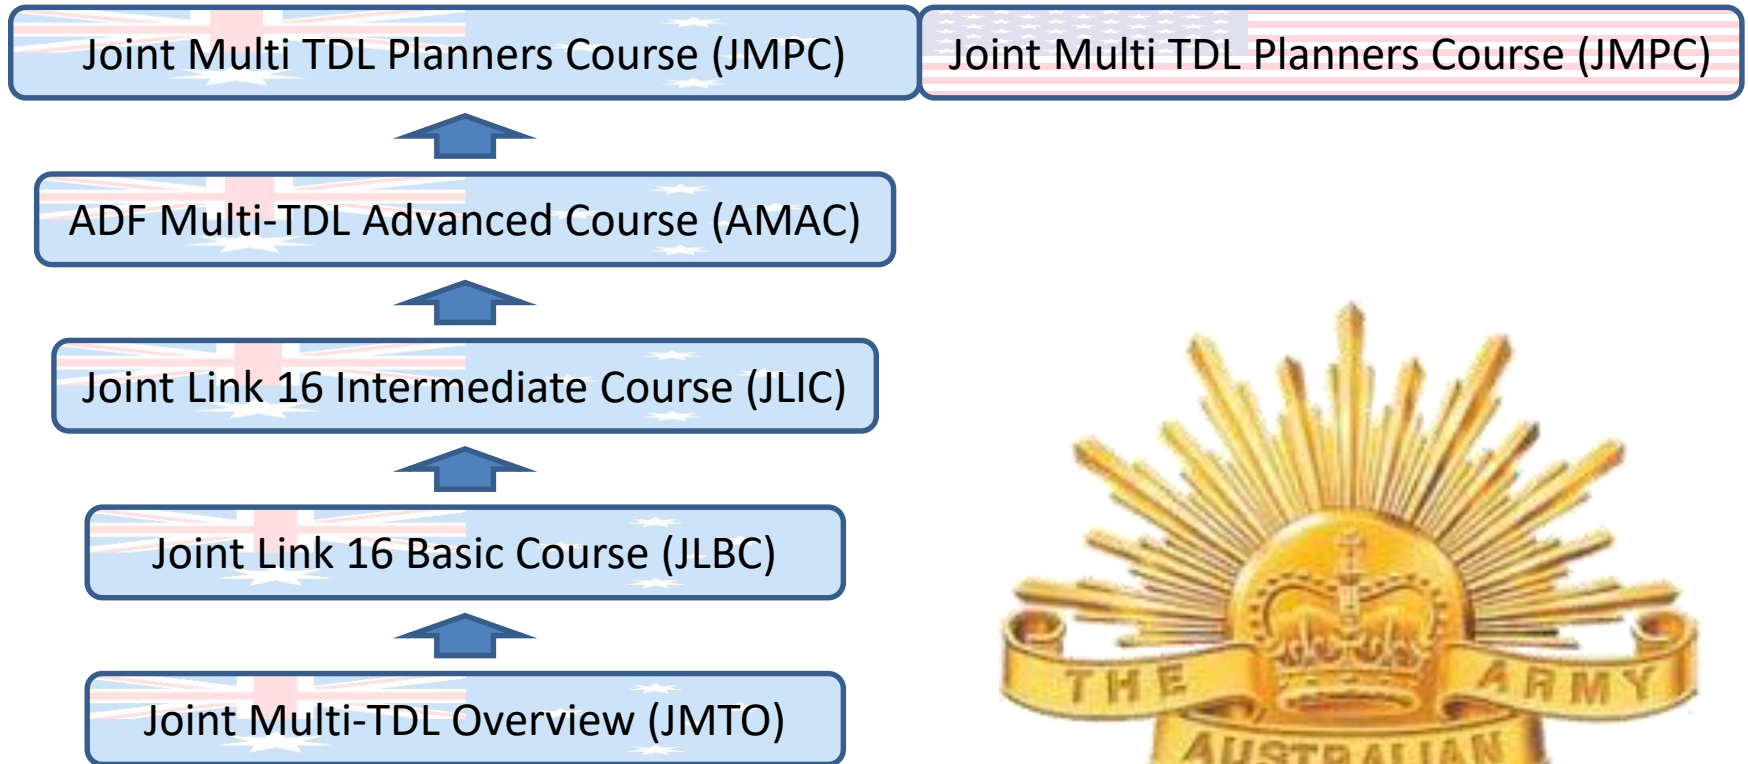

ADF Multi-TDL Advanced Course (AMAC)

Tactical Data Link Coordinator (TDC)

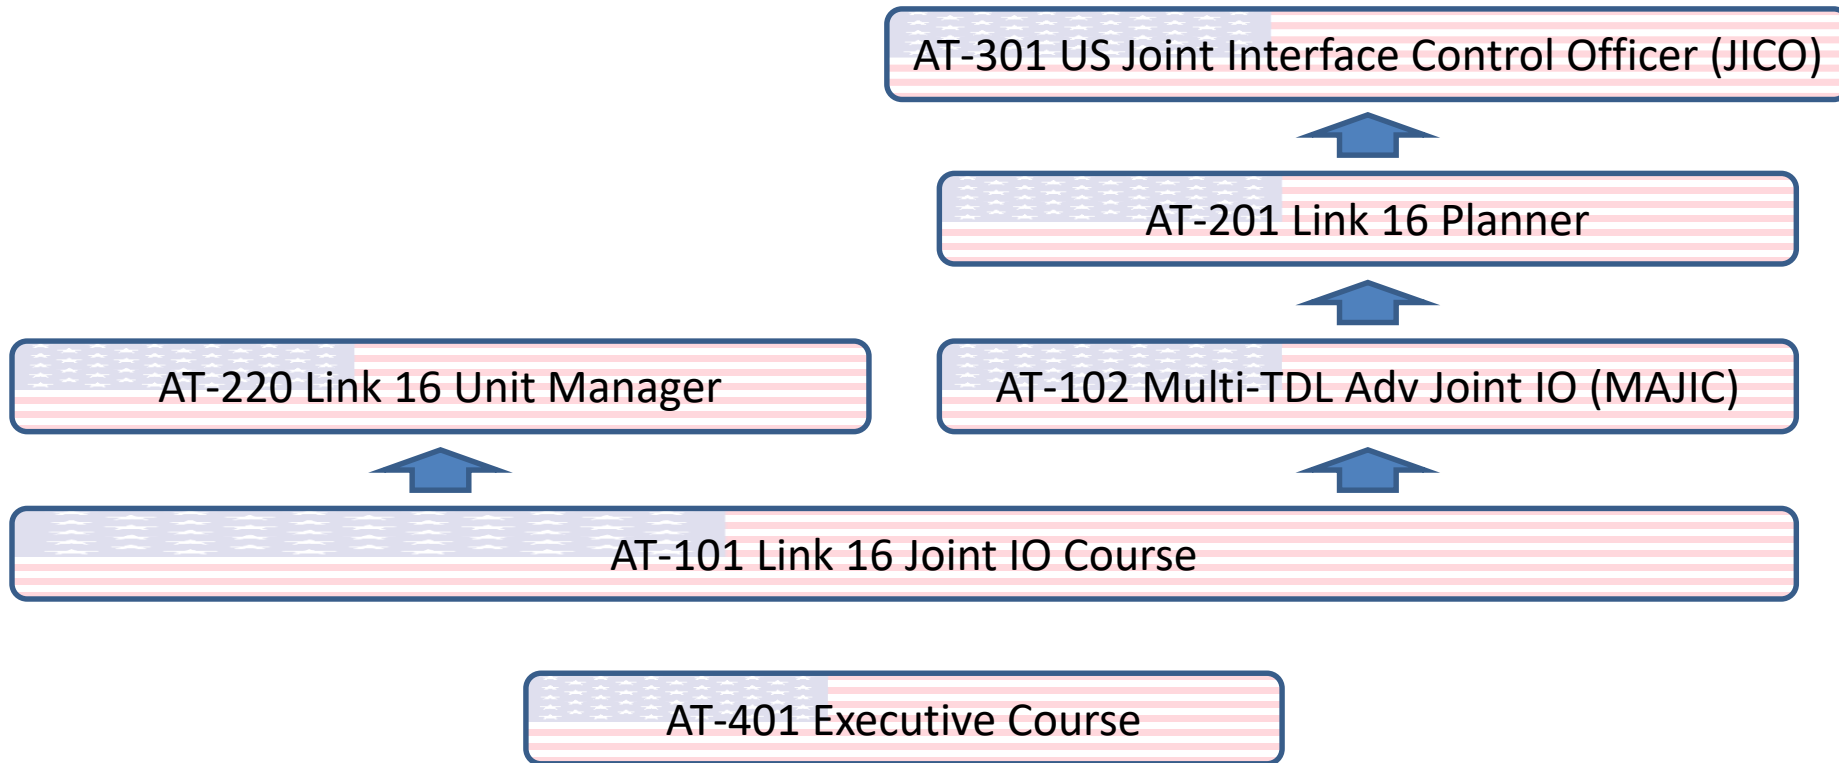

Current ARMY TDL Training

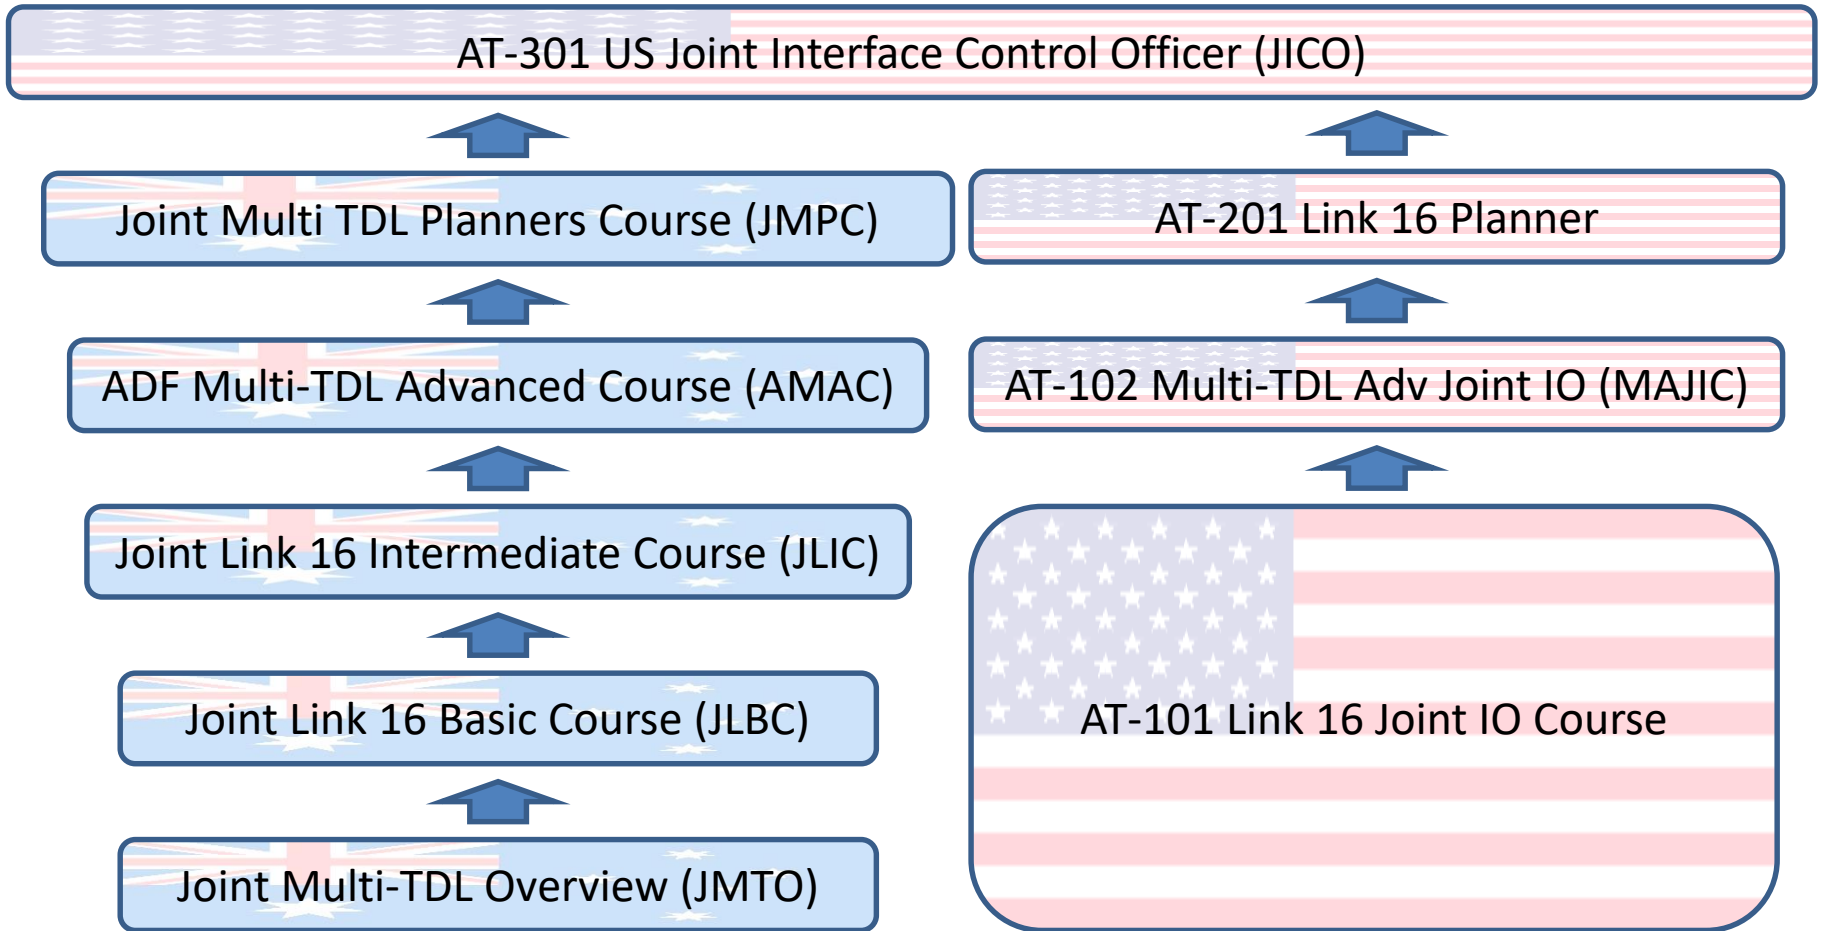

Current U.S JID TDL Training

Nova Systems

ADF Alignment to US JID TDL Training

Current NATO Qualification Levels

Nova Systems

NATO Level 4

↗ Allied TDL Publication (ATDLP)-5.55

NATO Level 3

↗ Emphasis on national qualification

NATO Level 2

↗ Theory, Practical & Live operations

NATO Level 1

↗ Three year proficiency

National Course(s)

- **Don't** learn in isolation either by service or TDL
- Develop personnel based upon role and not rank
- Include simulation and/or live ops at every level

We aim to train operators, not just in procedures, but to increase their judgmental abilities. We do this by placing trainees in truly immersive, relevant, scenarios where they must make judgements that achieve their mission aims

UK Defence Systems Approach to Training (DSAT)

A Way Forward

Nova Systems

- Consider a move away from U.S Joint Interoperability Division (JID) training or enable a more collaborative approach

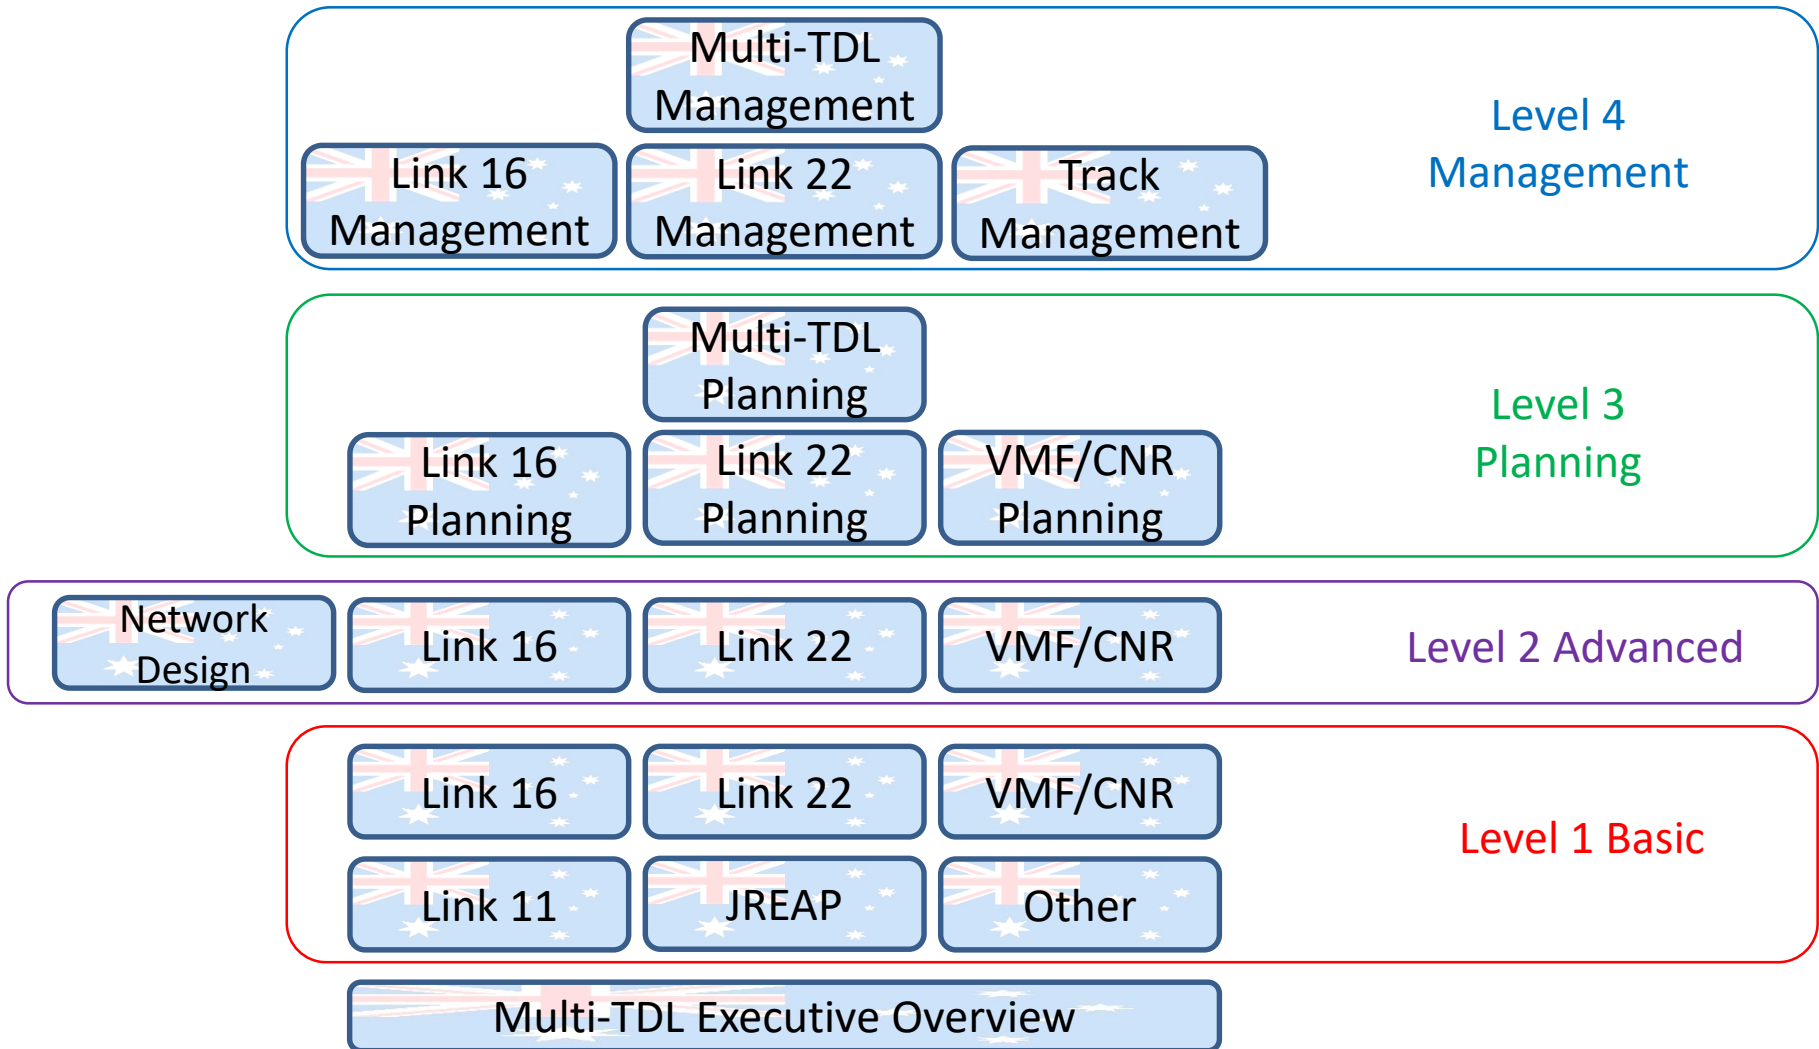

- Define a wholly Australian Tri-Service TDL learning path
- Create flexible modular based training

A Way Forward

Nova Systems

A Way Forward

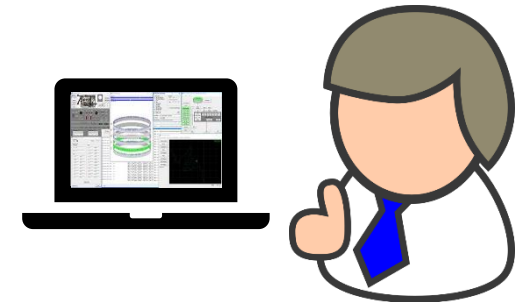

Level 1 Basic

Suggested Modules
System Architecture
Link 22 Networks & Addressing
Initialisation
Messaging
OPTASK Link Segment

Final Thoughts

Nova Systems

- Highly knowledgeable and experienced TDL personnel are employed within Australian Defence and Industry
- Technical simulation solutions exist or are being developed within Australia
- Government is committed to maximising opportunities for competitive Australian businesses; building export potential, depth of skills and diversification for defence industry²

“We’re only bound by the constraints that our mind places upon our circumstance. If we choose we can step up to the mark”

General Angus John Campbell, AO, DSC
Chief of the Australian Defence Force

Any Questions
